

Paper Code: M-EPA-SHCSWAP02ANS3005

Level 3

Senior Healthcare Support Worker Adult Nursing Support Mock Multiple-Choice Test

Information for registered centres

The seal on this examination paper must only be broken by the candidate at the time of the examination.
Under no circumstances should a candidate use an unsealed examination paper.

Information for candidates

Under no circumstances should you, the candidate, use an unsealed examination paper.

This examination consists of **60 multiple-choice** questions.

Part A is the core multiple-choice questions, this contains 40 questions worth a total of **40 marks**.

Part B is the pathway multiple-choice questions, this contains 20 questions worth a total of **20 marks**.

You must achieve **16 marks** for Part A and **8 marks** for Part B.

The exam is worth **60 marks**, with a Pass being **24 marks**, and Distinction **45 marks**.

The duration of this examination is **90 minutes**.

You are **NOT** allowed any assistance to complete the answers.

You must use a pencil to complete the answer sheet - pens must **NOT** be used.

When completed, please leave the **examination answer sheet (EAS)** on the desk.

EXAMINATION ANSWER SHEET (EAS) INSTRUCTIONS:

For each question, fill in **ONE** answer **ONLY**.

If you make a mistake, ensure you erase it thoroughly.

You must mark your choice of answer by shading in **ONE** answer circle only.

Please mark each choice like this:

01 ☐ A ☐ B ☐ C ☒ D **ANSWER COMPLETED CORRECTLY**

Examples of how NOT to mark your examination answer sheet (EAS). These will not be recorded.

01 ☐ A ☐ B ☐ C ☒ D **DO NOT** partially shade the answer circle
ANSWER COMPLETED INCORRECTLY

01 ☐ A ☐ B ☒ C ☒ D **DO NOT** use ticks or crosses
ANSWER COMPLETED INCORRECTLY

01 ☐ A ☐ B ☐ C ☒ D **DO NOT** use circles
ANSWER COMPLETED INCORRECTLY

01 ☐ A ☐ B ☒ C ☒ D **DO NOT** shade over more than one answer circle
ANSWER COMPLETED INCORRECTLY

All candidates **MUST** sign the Examination Answer Sheet (EAS) in the bottom right-hand corner of the page before leaving the examination room.

Part A is comprised of the following **40** core questions.

1

Why **must** a senior healthcare support worker ensure they always wear the correct personal protective equipment (PPE)?

- A. To avoid cross contamination
- B. To ensure a positive reputation for the setting
- C. To keep equipment costs low
- D. To maintain the cleanliness of the setting

2

Which of the following is a **key** requirement of the clinical audit process?

- A. Findings must be kept confidential to prevent any tampering
- B. Findings must be published to ensure the integrity of the setting
- C. They must be based on predetermined criteria to confirm regulatory compliance
- D. They must be completed randomly to accurately assess staff's standard performance

3

How do organisational policies ensure that diversity and equality are maintained in a setting?

- A. By focusing on the physical needs of individuals and addressing other needs as a secondary priority
- B. By stipulating that all care plans must be standardised to ensure fairness and neutrality
- C. They require reasonable adjustments to be made so that the holistic needs of individuals are met
- D. They state that reasonable adjustments should only be implemented if staff agree they are required

4

What is the **first** step to take when administering intravenous medication?

- A. Ask a colleague to monitor for any reaction to the medication
- B. Clean the area of the skin where medication will be administered
- C. Record the medication administration in the individual's notes
- D. Verify the identity of the individual receiving the medication

5

An individual is temporarily incapacitated and unable to consent to a procedure. The appropriate action for a senior healthcare support worker to take is to:

- A. ask a family member to give consent on the individual's behalf as they will act in their best interest
- B. complete the procedure without gaining consent as it is necessary for the individual's health
- C. postpone the procedure and wait for the individual to regain capacity before requesting consent
- D. seek consent from a legally appointed person and inform the individual as soon as possible

6

What piece of current legislation guides the actions of senior healthcare support workers when dealing with antibiotics?

- A. The Control of Substances Hazardous to Health Regulations (COSHH)
- B. The Health and Safety (First-Aid) Regulations
- C. The Management of Health and Safety at Work Regulations
- D. The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR)

7

Which of the following is typically a sign of visceral pain?

- A. Deep and dull pain that is poorly localised
- B. Deep and dull pain that is well localised
- C. Sharp and intense pain that is poorly localised
- D. Sharp and intense pain that is well localised

8

A new individual on the ward is hard of hearing. What is the appropriate way to communicate with them?

- A. Allow the individual to begin all discussions and use their preferred communication methods
- B. Ensure that the appropriate communication aids are available and their preferences are clearly noted
- C. Rely on previous experience with similar individuals to guide communication
- D. Request that a manager is available for support during all communication with them

9

How does observing the practice of others support own professional development?

- A. It enhances own understanding through real world experience
- B. It ensures person centred care is promoted for all individuals
- C. It prevents the use of outdated practices
- D. It reduces the need to reflect on own practice

10

- B. Clear responsibilities, continuity and emphasis on routine
- C. Collaboration, rigid goals and uniformity
- D. Flexibility, specific goals and multidisciplinary involvement

39

What is the appropriate source for information about a senior healthcare support worker's role and responsibilities in protecting individuals from abuse?

- A. Conversations with colleagues
- B. Local safeguarding policy
- C. Medical forums
- D. Modern slavery helpline

40

To obtain valid consent, a senior healthcare support worker **must**:

- A. explain the risks and benefits repeatedly until the individual agrees
- B. offer clear and detailed information and request an immediate response from the individual
- C. provide accurate and clear information and give the individual time to make a choice
- D. request that the individual agrees and then provide information

Part B is comprised of the following **20 pathway questions**.

41

The **main** reason for regularly monitoring an individual's blood pressure is to assess the efficiency of the:

- A. cardiovascular system
- B. digestive system
- C. renal system
- D. urinary system

42

Which of the following is an appropriate method for supporting the wellbeing of individuals?

- A. Encouraging independence and the use of herbal remedies
- B. Focusing on immediate treatments rather than long term objectives
- C. Offering ongoing support and health assessments
- D. Recommending medication as the main way to maintain health

43

What piece of equipment is used to measure oxygen saturation?

- A. Glucometer
- B. Pulse oximeter
- C. Sphygmomanometer
- D. Stethoscope

44

An individual on the ward needs support to dress. What **must** be considered when doing this?

- A. Allowing the individual to choose their own clothing
- B. Ensuring that the clothing is appropriate for the individual's specific needs
- C. Selecting the clothing based on its comfort rather than functionality
- D. Using clothing that is easy to put on and take off

45

Which of the following is a **common** impact of poor sleep?

- A. Increased inflammation
- B. Increased pain sensitivity
- C. Seizures
- D. Weight gain

46

Blurred vision is a **common** sign of:

- A. hypertension
- B. hypoxia
- C. pyrexia
- D. tachycardia

47

The role of the extended health and social care team in an individual's discharge is to offer:

- A. community based services
- B. emergency medical care only
- C. immediate outpatient care
- D. short-term emotional support

48

What part of the body does rheumatoid arthritis **mainly** effect?

- A. The brain
- B. The joints
- C. The kidneys
- D. The muscles

49

Which of the following clinical tasks are typically completed by senior healthcare support workers?

- A. Managing care plans
- B. Monitoring physiological state
- C. Performing diagnostic tests
- D. Providing physical therapy

50

Which of the following is a **common** impact of dehydration on an individual's cognitive function?

- A. Difficulty concentrating
- B. Forgetfulness
- C. Negative mood
- D. Slow decision making

51

What action **must** be taken if an individual requires a nebuliser for use at home?

- A. Direct them to an appropriate online retailer
- B. Offer them 1 that is no longer used by the department
- C. Refer them to the correct specialist service
- D. Suggest they ask a family member to purchase 1 for them

52

What is the normal body temperature of an adult?

- A. 35°C
- B. 36°C
- C. 37°C
- D. 38°C

53

An individual has poor mobility which needs to be improved before they are discharged. What is the appropriate service to refer them to?

- A. District nursing
- B. Physiotherapy
- C. Psychological therapies
- D. Social services

54

Which of the following are **both** typical **first** signs of malnutrition?

- A. Fatigue and pale skin
- B. Frequent infections and disorientation
- C. Nausea and stunted growth
- D. Weight loss and temperature sensitivity

55

An individual is unable to attend to their own personal hygiene needs. The appropriate action to take to support them is to assess their needs and:

- A. ask a colleague to monitor their hygiene habits
- B. ensure a strict hygiene schedule is implemented regardless of their feelings
- C. make a referral to their general practitioner (GP)
- D. provide the required support while maintaining their right to choose

56

What is the normal pulse rate for adults?

- A. 20-60 beats per minute
- B. 60-100 beats per minute
- C. 100-120 beats per minute
- D. 120-140 beats per minute

57

Which of the following are **both** common physical impacts of dementia?

- A. Hypersexuality and seizures
- B. Skin sensitivity and fatigue
- C. Tremors and hallucinations
- D. Weight loss and incontinence

58

Which of the following actions **must** be taken to ensure that a pulse oximeter is in correct working order before use?

- A. Checking that the screen is not scratched
- B. Cleaning it with a dry cloth to prevent cross-contamination
- C. Confirming that the sensor light is functioning properly
- D. Testing it on various individuals to confirm calibration

59

Which of the following is an appropriate method for supporting an individual to improve their mobility?

- A. Allowing them unrestricted movement
- B. Encouraging reliance on physical aids
- C. Recommending intensive and immediate intervention
- D. Tailoring exercises to their specific needs and ability

60

How does poor nutrition impact physical health?

- A. It can lead to delayed wound healing and a weakened immune system
- B. It may cause dizziness and shortness of breath
- C. It will improve metabolism and cause weight gain
- D. It will lead to improved cognitive and digestive function
