

Highfield Level 3 End-point Assessment for ST0189 Fire, Emergency and Security Systems Technician

Self-Assessment

This form is optional and can be used as part of a portfolio submission for the above standard in preparation for the professional discussion. Please ensure if used it is referenced and mapped on the portfolio matrix document and submitted to Highfield on the agreed date.

You should complete the sections below by indicating where or how you have demonstrated each behaviour during your on programme learning. It may help for you to give specific examples including any jobs you have completed where you have demonstrated this. Further information and guidance regarding the professional discussion can be found in the EPA Kit on our website.
