

PPG CORAFLO[®] PLATINUM

Embrace with color. Engage with color. Escape with color.

This innovative fluoropolymer powder coating technology is a unique combination of performance and beauty. It is AAMA 2605-certified, ensuring long-lasting durability in all colors, and has excellent corrosion resistance. It is the first high-transfer efficiency FEVE powder coating technology, providing applicators with ease of use and less overall powder usage and waste. It offers a wide range of colors, effects and glosses, and is able to achieve the popular and timeless anodized metal color. Embrace, engage and escape with the *PPG Coraflo* Platinum collection.

Performance

- Higher transfer efficiency, >20% improvement over standard FEVE powders
- Extended gloss range from 5 – 85 vs. 25 – 70 for FEVE products
- Improved corrosion performance on aluminum in a single coat
- Specifically formulated without major substances of concern (TGIC, PFOA, VOCs, and more)

Enlightened

PPG CORAFYLON® PLATINUM

We protect and
beautify the world™

Embrace

Today's designs reflect how our search for acceptance has created new ways of personal exploration.

Engage

Technology has become an essential form of connectivity, allowing us to more completely engage with one another and share experiences.

Escape

Grounding ourselves in the natural world is a quiet escape to improve our well-being.
