

Interconnected surface system

Preformed thermoplastic crosswalk and streetscape surfaces for asphalt and concrete

ENNIS-FLINT® by PPG TRAFFICPATTERNS® anti-skid preformed thermoplastic material has the look of traditional pavers and stones without the high cost, installation hassle, maintenance and safety concerns associated with the real thing.

The pattern and color combinations of these interconnected sheets allow designers the flexibility to create a unique crosswalk or streetscape that complements the overall

Design

- Heavy-duty, intersection-grade pavement marking material
- Interconnected, 125-mil sheets with anti-skid elements
- Available in a variety of patterns, borders and colors

Installation

- Less work and maintenance than traditional pavers
- No custom tools, templates or grids needed
- Open to traffic within minutes of application

Pedestrian Safety

- Anti-skid elements distributed evenly throughout material for enhanced slip resistance
- As material wears, new anti-skid elements are exposed

Compliance/Certification

- ADA-compliant pedestrian and wheelchair friendly surface
- Facility is ISO 9001:2015 certified for the design, development and manufacturing of preformed thermoplastic

Installation

ENNIS-FLINT® BY PPG TRAFFICPATTERNS® preformed thermoplastic material is installed by a network of certified applicators and pre-qualified contractors using an infrared heater and propane heat torch. The 2' x 2' sheets of interconnected material are surface applied without the need for stamping templates or grids. Border segments can be added for design variability.
