

## PPG Factory Package

### **BEST PRACTICE:**

Due to the lead time required to get these special requests, it is a best practice at many collision centers to have estimators use PPG's COLORMOBILE® software as part of the initial estimate writing. When the vehicle manufacturer and paint code are entered, the formula is immediately available to the writer. Higher priced colors, tricoat finishes, special colors, limited use toners and colors only available as factory package are flagged so that the estimator can make adjustments to the initial estimate and avoid the supplement process. When these special colors are identified at the beginning of the process, the painter can pre-order material and production delays can be avoided.

### **FACTORY PACK BASECOAT COLORS:**

8Y0 Lexus – Structural Blue

### **FACTORY PACKAGE MID-LAYER COLORS (BASE-LAYER IS INTERMIX):**

J9 Ford – Orange Spice

NL Ford – Orange Fury

B605P-A Honda – Immersion Blue

B605P-PMC Honda – Immersion Blue

### **NOTE:**

Due to the time needed to process the request, mix the paint, and ship via ground, orders for factory package processed through the local distributor may require 7-10 days. Please make appropriate allowances when ordering.

**8Y0 STRUCTURAL BLUE** 🌐  
TOYOTA 2018
