

PAINT SOLUTIONS FOR HEALTH CARE FACILITIES

DULUX® Paints One Brand. Infinite Solutions for Health Care.

Health care facilities provide unique maintenance challenges due to the broad range of demands placed on their physical space. From the operating rooms and hallways to offices and patient rooms, the paint performance maintenance needs vary greatly. Such diversity calls for flexible facility management to provide notable paint maintenance while keeping the interest of the patient and the employees at the forefront of concern.

If you would like advice or a tailored approach for your paint maintenance program, our dedicated maintenance team is here to help. A paint maintenance specialist can guide you in your paint selection process to meet your maintenance challenges and can also provide an initial on-site consultation. Once you partner with us for all of your paint maintenance needs, we can provide you with a Facility Paint Maintenance and Operating Binder documenting both product and colour recommendations throughout your entire health care facility.

KEY CONSIDERATIONS FOR PRODUCT SELECTION

Selecting the right paint products for health care facilities is essential. Several key considerations need to be taken into account when selecting the appropriate paint products:

High traffic areas that take physical abuse like lobbies, hallways and waiting areas

Areas that need to withstand **rigorous cleaning procedures** such as operating rooms and hallways

Areas where **slip and fall protection** is of paramount importance like hallways, loading docks and generally any public access space

Areas where **zero- or low-VOC** and low-odour products are required like patient rooms and waiting rooms

Areas where **fast turnaround times** are needed to ensure minimum disruption like patient rooms, waiting rooms and offices

RECOMMENDED PAINT SOLUTIONS FOR HEALTH CARE FACILITIES

INTERIOR PAINTS

DULUX® DIAMOND™

- Premium acrylic formula offers excellent adhesion to multiple substrates for a durable finish
- Cross-linking technology for stain and household chemical resistance
- Easy Flow Modifiers give the formula excellent flow and leveling, for a beautifully smooth finish

DULUX® LIFEMASTER®

- Our highest quality zero VOC* low-odour paint allows for early reentry
- Excellent adhesion to most surfaces for a durable finish

*Colourants added to this base paint may increase VOC level significantly depending on colour choice.

DULUX® X-PERT®

- Excellent touch-up
- Excellent flow and application properties

EXTERIOR PAINTS

DULUX® DIAMOND™ EXTERIOR

- Outstanding dirt and UV resistance
- Specifically formulated to resist mildew on the paint film
- High build for exceptional hide
- Low temperature application
- Quick dry 100% acrylic

DULUX® WEATHERGUARD™

- 100% acrylic paint formulated to guard against extreme weather conditions
- Tough, durable finish
- Excellent gloss and colour retention
- Exceptional adhesion

PERMA-CRETE™

- Full line of masonry coatings includes: fillers, sealers, primers, elastomers, textured coatings topcoats (vertical above-grade) and topcoats (horizontal capable)

COLOUR EXPERTISE

A wide range of social factors and trends affect how health care facilities are designed. It is also the type of care facility that influences colour and design selections. From children's hospitals and cancer treatment centers to long-term elder care and women's centers, each facility has different needs requiring different colours and design elements for a better patient experience. At Dulux Paints, we consider colour at every angle: aesthetics, trends, digital, matching and performance. A comprehensive suite of colour tools and services offer the opportunity for you to engage with colour the way we see and specify it.
