Search

You can search by MP#, Color System or Corporate Color System.

Search by MP#

3. Click on the search type “MP # button.” Position your cursor in the “MP Number” field and start typing the MP number you are searching for. As you type the number, a dropdown box will appear. Click on the MP number you are searching for then click on the “Search” button (See 3A). Select the appropriate box next to the product line you are searching for, then click the button labeled “ADD to Print Results” (See 3B).

Search By Color System

Click on the search type “Color System” button. Position your cursor in the “Color System” field and start typing the Color System you are searching for (Pantone, for example). As you type, a dropdown box will appear. Click on your desired color system (See 3C). You can then choose to search by Color System Number or Color Name by clicking on the appropriate type. Enter your color system number or name in the “Search By” field. A dropdown box will appear where you can select your desired color (See 3D).

Select the appropriate box next to the product line you are searching for, then click the button labeled “ADD to Print Results.”

If you add a formula to your print results that is **RED** under the “Product Line” field, a box will pop up to let you know that your formula is NOT available. It will then ask you if you would like a computer generated formula. If you click “OK,” it will add a computer generated formula to your print results. When you print that formula, the formula will state “**This is a Computer Generated Formula**.” If you click “Cancel,” a separate box will appear and tell you to call customer service for your formula.

Search By Corporate Color System

Select the appropriate search type. In the “Sub Color System” field, type in the corporate project name (Wells Fargo, for example). As you type, a dropdown box will appear and you will need to select the name you are searching for (See 3E). In the “Color Name” field, type in the color name and/or select it from the dropdown menu. You can search for current or archived Corporate Colors (See 3F). You can then select the formula you would like. If the Corporate Color you are searching for shows in RED under the “Product Line” field, and you try to add it to your print results, a box will pop up telling you that your formula was not added because you do not currently have access to this color formula. You will then need to contact customer service at 800-323-6593 for formula assistance.

Print Results

4. Your formula request will appear under “Print Results.” If you have more than one formula to print, you can select another MP # to search and print multiple results at one time. To print one formula, place your cursor under the “Print Formula” tab and click on the printer icon (See 4A). To print all formulas, place your cursor over the “Print Formula” tab and click on the printer icon. Your formula(s) will appear in a separate window as shown below (See 4B). To print a label, use the dropdown box under the “UOM” tab to select the unit of measure label you would like to print. Place your cursor under the “Print Label” tab and click on the printer icon. Your label will appear in a separate window as shown below (See 4C).

Matthews Paint color formulas are provided in good faith as a service to our valued customers. We strive continuously to furnish accurate formulas for all color needs. Due to normal variations in pre-printed color cards, pigments and application methods, Matthews Paint company cannot warrant color formulas for unverified use as approved color standards or exact match to every pre-printed color card. Some formulas containing 940 may cause pre-mature fading in exterior exposure. As a best practice we recommend users mix and verify critical colors directly with a customer prior to production and periodically during extended programs. In the unlikely event you experience difficulty with a Matthews formula or color match, please contact us immediately at 1-800-323-6593. Our trained professionals are committed to quickly and expertly satisfying your color needs.

4B. Print Color Formula Example:
