

NOTE: Wear proper safety protection during repair processes.

PRODUCT DESCRIPTION:

T4850 Vivid Red Ruby is a brilliant deep red color toner offering a high depth effect.

This striking color tone effect is created by a 3CT layer paint process using special pigments.

T4800 is a transparent toner to support the mid layer.

T4800 has improved transparency versus T490. T4800 will allow light to pass through with little to no scattering or absorption. This allows a clear appearance over ground layer colors. T4800 is not a product to be used as a wet bed for the blend process.

T4850 and T4800 Mix Ratios:

Traditional Optional Mix Ratios using T493:

Metallic/Solid Colors: **100:10:5:5** (EHP+T492+T494/T595+T493)

OVM Optional Mix Ratios using T493:

Metallic/Solid Colors: **100:20:5:5** (EHP+T4900/T4910+T494/T595+T493)

Metallic/Solid Colors: **100:10:15:5** (EHP+ T4900/T4910+T494/T595+T493)
