

MIRKA

Mirka® PBS 10/13NV

Pneumatic Belt Sander for narrow belts

The Mirka® Pneumatic Belt Sander is an ergonomically and cleverly designed sander for narrow belts. Thanks to its user friendly design, easy adjustment and low vibration levels, it is the optimal tool for cleaning up welding seams in vehicle or marine manufacturing and body repair, as well as for removing rust and paint in body shop work and collision repair. It works especially well together with Mirka's new line of narrow sanding belts and other solutions for panel beating.

Benefits

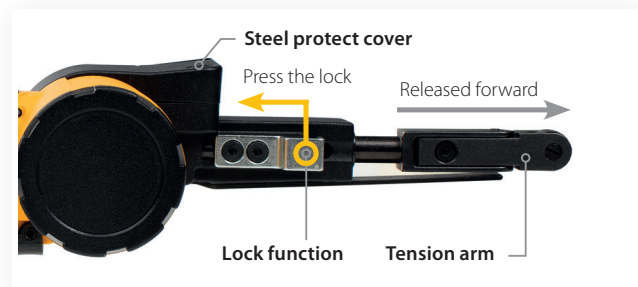

- ▶ Easy belt changes thanks to the clever tension mechanism.
- ▶ Easy to set the speed with knob on the top.
- ▶ Easy to set angle on the machine.
- ▶ Low noise level
- ▶ Comfortable to hold with rubber coated handle.
- ▶ Arm angle adjustment tool cleverly integrated into the handle.

How to change the Belt

To release the belt, press the tension arm towards the steel protect cover to disengage the lock function. Open the protect cover by loosening the cover knob.

Replace with a new belt. Close the protect cover and tighten the cover knob. Fixate the new belt by pressing the lock towards the steel cover – which releases the tension arm forward.

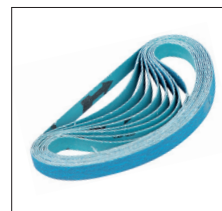

NEW!

Mirka® File Belt CER

- Self-sharpening grains for maximum stock removal
- Top size layer for reducing the temperature in the grinding zone
- High wear resistance

NEW!

Mirka® File Belt ZIR

- High Stock removal
- Long life
- Friction and heat resistant
