Risk and Reward

How to handle market volatility and build long-term wealth

By Ben Carlson

Ben Carlson, one of the best finance writers of his generation, describes the very worst that can go wrong in investing – and why long-term investing still works. When investing your hard-earned money, risk and reward are inescapably intertwined. And there are no shortcuts. Getting rich overnight is a pipedream.

Carlson explores the risks of long-term investing by analysing key moments in our financial history like the Great Depression and its aftermath in the 1930s, to the Japanese financial bubble of the 1980s, to the bursting of the dot-com bubble in the 2000s. From this, it becomes apparent that long-term investing is not without risks, but the rewards might just be worth it. By the end of this book, you will have a better grasp of the biggest risks in investing and how to protect yourself against them so you can survive the short-term, and thrive in the long-term.

Ben Carlson is the Director of Institutional Asset Management at Ritholtz Wealth Management and advocates long-term investment strategies. He is the author of four books as well as the creator of the blog “A Wealth of Common Sense” which breaks down wealth management and financial markets. Ben has over 280k followers at X @awealthofcs and co-hosts the popular Animal Spirits podcast, a weekly show about markets, life, and investing.

What's Up With Women and Money?

How to do all the financial stuff you've been avoiding

By Alison Kosik

Former CNN/CNN International Anchor and Business Correspondent Alison Kosik found herself trapped in a failing marriage. The savvy mother of two was terrified to leave her husband. Why? She didn't have the confidence to take on big financial decisions on her own. Despite spending her working hours explaining financial and business concepts, she had allowed her husband to take charge of all their big money decisions and had no clue how to do any of it on her own. It turns out plenty of educated and high-achieving women – married or single – avoid getting involved with managing their financial lives.

In *What's Up With Women and Money?* Alison gives a step-by-step action plan on a variety of money topics and interviews dozens of women who share their cautionary tales of why avoiding money decisions can lead to bad outcomes. Alison talks one on one with inspirational women like Sheryl Sandberg, Rebecca Minkoff, Jessica Alba, Barbara Corcoran, and Deepica Mutyala – women who inspire other women and help them gain confidence to take control of their financial lives.

Alison simplifies complicated financial topics, breaking them down into easy to follow steps, with practical tidbits that make each page accessible, digestible and fun.

The Humble Investor

How to find a winning edge in a surprising world

By Daniel Rasmussen

The Humble Investor establishes the truths about what works in investing, through study of the data. How to find the right investments to buy and hold – and avoid the wrong ones. How to exploit pockets of investment opportunity and invest successfully through bubbles, crises, inflation, and other tests of time. Why just be contrarian when you can bet against consensus and be right? Through a meta-analysis of what moves markets and what drives human behaviour, Daniel Rasmussen cuts through the 60/40 portfolio, exposing where empirical evidence shows the best opportunities – and where projections, models, and experts often fail – to create an asset allocation that can withstand the tests of time.

Daniel Rasmussen is the founder and portfolio manager of Verdad Advisers, a \$900m hedge fund. Before launching Verdad, he worked at Bain Capital Private Equity and Bridgewater Associates. In 2017, Rasmussen was named to the Forbes 30 under 30 list. He is a contributor to the *Wall Street Journal*.

The Uncomfortable Truth About Money

How to live with uncertainty and learn to think for yourself

By Paul Podolsky

We are all stuck in a money cage. Money isn't the most important thing, but it is a thing and you can't get away from it. Birth costs money and death costs money. So even if you hate talking about money, you need to know the basics, the same way you need to know how to cook yourself a simple meal.

The problem with most money books is that they are not written by practitioners and avoid hard truths. What a weathered investor knows is that stocks are not always good for the long run. They know that being stingy helps accrue wealth. They know the big thing when you buy property has nothing to do with the property. They know the big thing is less what happens to the markets in a day than if the entire system holds together. And they know what to look for if it's time to pull out.

This book will teach you a lifetime of money learnings distilled to a thin volume, like a basic cooking recipe you can follow.

Same as Ever

Timeless lessons on risk, opportunity and living a good life

By Morgan Housel

When planning for the future we often ask, “What will the economy be doing this time next year?” Or, “What will be different ten years from now?”

But forecasting is hard. The important events that will shape the future are inherently unpredictable. Instead, we should be asking a different question:

- What will be the same ten years from now?
- What will be the same one hundred years from now?

Knowledge of the things that never change is more useful, and more important, than an uncertain prediction of an unknowable future.

In *Same As Ever*, bestselling author Morgan Housel shares 24 short stories about the ways that life, behaviour, and business will always be the same. Armed with this knowledge of the unchanging, you will have a powerful new ability to think about risk, opportunity, and how to navigate the uncertainty of the future.

As you see familiar themes repeat again and again in the years ahead, you’ll find yourself nodding and saying, “Yep, same as ever.”

The Behavioral Investor

By Daniel Crosby

The Behavioral Investor takes an applied look at how psychology ought to inform the art and science of investment management.

Psychologist and asset manager Dr Daniel Crosby examines the sociological, neurological and psychological factors that influence investment decisions and offers practical solutions for improving both returns and behaviour.

Readers will be treated to the most comprehensive examination of investor behaviour to date and will leave with concrete solutions for refining decision-making processes, increasing self-awareness and constraining the fatal flaws to which most investors are prone. The Geometry of Wealth

How to shape a life of money and meaning

By Brian Portnoy

How does money figure into a happy life? Behavioural finance expert Brian Portnoy delivers an inspired answer, building on the critical distinction between being rich and being wealthy.

While one is an unsatisfying treadmill, the other is the ability to underwrite a meaningful life, however one chooses to define that. Truly viewed, wealth is funded contentment.

In this accessible and entertaining book, Portnoy reveals that true wealth is achievable for many – including those who despair it is out of reach – but only in the context of a life in which purpose and practice are thoughtfully calibrated.
