NOTES

¹ See Regulation Glossary: **PPM**: Points Per Match: A calculation (Total Points ÷ Matches Played) used primarily to compare the performance records of teams across Parallel Divisions.

² If an existing Club from another Area moves to the Midlands, then to place them in a Grade level which is the same as in their current Area, it may be necessary for extra relegations at that and lower Grade levels to accommodate. Their current Area Grade will be confirmed following the application of promotions & relegations in their current area at the end of the season. This will be confirmed as soon as possible, but an indication given at the beginning of the second half of the season.
