

Ennis-Flint® by PPG Traffic Paint

Airfield Traffic Paint

Waterborne traffic paint for airfields meets TT-P-1952F specifications/Fed Std. No 595 colors

A broad portfolio of traffic paint products

ENNIS-FLINT® by PPG TRAFFIC PAINT pavement markings offer a full line of waterborne traffic paint products for airfields.

These products are formulated specifically for airless equipment and conventional air atomized equipment used in painting airport runways and taxiways, and are suitable for use on asphalt or concrete surfaces.

Formulations

Stable, non-flammable with excellent bead retention

The glass beads used in conjunction with these markings meet specification TT-B-1325D

Installation

Waterborne traffic paint is based on proven acrylic emulsion technologies and is formulated for use in temperatures as low as 35°F to as high as 120°F

Safety

Fast dry traffic paint minimizes traffic control when restriping
High build traffic paint dries to “no track” in 3 minutes or less under standard conditions at 30 mils and has the ability to hold larger beads for enhanced retroreflectivity

Compliance/Certification

Facility is ISO 9001:2015 certified for the design, development and manufacturing of waterborne traffic paint
