

## Colors that offer beauty and protection

PPG is your choice for excellent protection and color versatility. Our coatings are available in colors and hues that compliment every style. These colors are specially formulated to provide excellent hiding and durability and offer a wide range of colors for both semi-transparent and solid color finishes to meet application and aesthetic specification needs.

If you don't find a color that meets your criteria, just ask your authorized PPG machine applicator about custom matching your color. At PPG, we have the ability to make any color vision a reality.

### Semi-transparent stains

OLYMPIC® Maximum semi-transparent stains add subtle color, allowing the beauty of the wood's grain and natural texture to show through. DURACOLOR® and MACHINECOAT® semi-transparent coating systems give the appearance of a wood grain look while offering full substrate UV protection. These products are recommended for use on fencing, siding, railings and other exterior building materials.

### Solid color finishes

Solid color finishes provide a rich, opaque color that provides outstanding surface protection. These coatings can be applied to new wood, composite and fiber-cement.

### Duracolor Semi-Transparent Stains

for fiber cement and composite substrates

- 100% acrylic latex
- Trans-oxide pigments used for outstanding UV performance\*
- Excellent flexibility reduces cracking
- Machine application formula for better overall consistency versus field application

Basecoat 1st Coat 2nd Coat

### MachineCoat Solid Color Finishes, Semi-Transparent Finishes and Semi-Transparent Stains

for wood substrates

- 100% acrylic latex
- Ready-mix colors or 3-base tint system
- *MachineCoat* Plus 9-base intermix system
- Excellent adhesion, flexibility and durability
- Specifically formulated for machine application

### Duracolor Solid Color Finishes

for fiber cement and composite-substrate siding and trim

- 100% acrylic latex
- Powerful mar resistance
- Excellent flexibility and adhesion
- Machine application formula for better overall consistency versus field application
- Long-lasting color retention and exterior durability
- Available in three tintable bases, nine factory-packed colors and a ten-base intermix system

### A global partner with localized support

As a global company with operations in more than 70 countries, PPG is uniquely equipped to service all of your coatings needs, including helping you meet specific, coating-related environmental mandates, troubleshooting production issues, assisting with setting up new equipment and identifying areas where your processes may be streamlined. When you partner with PPG, you gain access to world-class technical services, color expertise and a global supply chain that delivers your products reliably on time, every time, anywhere in North America.

### Set-up and ongoing support

We'll work with your team to establish best practices that include help designing your coating system, assistance setting up your equipment and fine-tuning or troubleshooting your processes. Once you get going, we'll make sure you get the support your system needs, including local color matching, performance testing and regular line audits.

### Dependable inventory management

A PPG partnership includes a personalized inventory management program, so you have the materials you need, delivered when you need them. Our regional distribution and local outlets can support your individual supply requirements.

We protect and beautify the world™

### PPG is an originator and a leader in machine coating technology

PPG machine-applied coatings offer numerous advantages over field-applied coatings, including:

- Controlled application to a controlled substrate in a controlled environment
- Edge-to-edge substrate coverage delivers more durability
- Exceptional quality finish
- Extends the building season
- Avoids costly job site weather delays
- Backed by PPG warranty programs\* and our time-proven history of quality and success

### The PPG benefit

PPG coatings are the ideal choice for all of your siding, trim and fencing requirements. Our authorized network of certified machine applicators adhere to strict standards that ensure the product you receive meets your specifications:

- Substrate to be coated is first inspected and tested for proper moisture content
- Calculations are completed to determine the exact amount of coating to be applied
- Coating is then machine applied in a controlled environment with specific temperature and humidity ranges
- Process provides an even, consistent coat and exceptional quality finish
- Finished products are properly dried, inspected and packaged

\*Warranties vary by product and the number of coats applied. Ask your authorized PPG machine applicator for complete details.

\* Not all colors contain trans-oxide pigments.
