

# An economical bakeware coating for coil

## A single-coat non-stick system for entry-level bakeware products

PPG SKANDIA® coatings balance performance and cost effectiveness.

## A global partner with local presence

With over 135 years of innovation, PPG protects and enhances more surfaces in more ways than any other company. Our global expertise ensures eye-catching color, a range of durability options and formulations that meet the strict food-contact compliance your region demands, while our local presence provides the expert service and resources you need.

### Good overall durability

Good wear/scratch resistance and release

### Customer benefits

Oven safe up to 230° C (446° F)

Easy cleaning

Available in formulas without adding NMP

### Food-contact compliance

Specifically formulated to comply with regional food-contact regulations

### Product Characteristics

Chemistry	PTFE
Coating Type	Interior
Color	Available in a variety of colors and effects
Continuous Use Temperature	230° C / 446° F
Cure Temperature	370° C / 698° F minimum temperature
Substrates	Electrolytic chromium coated steel (ECCS), aluminized steel, aluminum

### Performance Properties

Dry Film Thickness (WTM 114A)	5 - 7 µm
Dry Abrasion Cycles Test (WTM 135C)	< 1,000 cycles
Cake Release Test (EN 13834 Annex C)	10+
Steak Release Test (EN 13834 Annex D)	10+

### Use and care recommendations

- Bakeware should not be used as a food storage container, which could result in staining the non-stick surface.
- Always allow bakeware to cool before immersing in water.
- For long-term performance, it is recommended to hand wash the article using a soft sponge and hot, soapy water. Abrasive sponges or scouring pads should not be used.

### Availability

EMEA, Americas

### Product Series Codes

88-732 Single Coat

### Relative Coating Performance

Best: High Performance	SKANDIA® Xtreme HR
Better: Balanced	SKANDIA® Xtreme
Good: Economical	<b>SKANDIA®</b>
