CHAMPION COOLANTS & ANTIFREEZE RANGE

DISCOVER OUR TECHNOLOGY ENHANCED COOLANTS AND ANTIFREEZE RANGE FOR PASSENGER CARS, COMMERCIAL AND HEAVY DUTY VEHICLES.

+

BREAK **NEW** GROUND

Champion are the lubricants of choice whenever outward performance relies on inner power.

As individuals, we are always pushing ourselves, trying to go faster and further, reaching new heights. In doing so, we have never demanded as much from the engines that drive our vehicles as we do today.

RISE. EXPLORE. DEFY.

We take you places where you didn't think you could go. It's about where you've never been before, unfamiliar roads, but with confidence. It's about facing new challenges heads on, without giving up. It's about you against the rest, it's about us together against the world.

A **TRUE** LUBRICANT **POWER**HOUSE

As one of Europe's leading independent lubricants companies, we pride ourselves on being a 'pure player' in our industry. We are 100% dedicated to lubricants.

We are a specialist, focusing on meeting the diverse needs and requirements of our customers with high-guality, technology-enhanced lubricants. Thanks to the expertise of our dedicated R&D team, our on-site laboratory and ISO certification, we quarantee the highest quality at every step of our production process.

WOLF OIL CORPORATION BELGIAN COMPANY, +65 YEARS OF EXPERIENCE

1 OF THE LARGEST INDEPENDENT LUBRICANT MANUFACTURERS IN EUROPE

IN-HOUSE LABORATORY R&D AND FULL CONTROL OVER QUALITY

ISO CERTIFIED QUALITY & ENVIRONMENTAL MANAGEMENT SYSTEMS

OEM EXPERIENCE FACTORY AND SERVICE FILL

MORE THAN 300 OEM APPROVALS PROOF OF TOP QUALITY PRODUCTS

CHOOSE THE RIGHT COOLANT & **ANTIFREEZE** FOR YOUR VEHICLE

Modern engines with their smaller and lighter design are purposed for increased power output resulting in higher operating temperatures putting ever increasing demands on your vehicle and its components. The cooling system and the fluid that runs through it are no exception.

Choosing the right coolant & antifreeze will help by not just regulating your engines temperature, but more importantly, ensuring the performance and longevity of your vehicle and avoid cooling system failure - one of the most common causes of vehicle breakdowns.

The choice of an incorrect or low-quality coolant & antifreeze risks exposing your vehicle to the build-up of rust and scale leading to **engine failure** and stressful unplanned maintenance and the costs that come with it.

Keep reading to learn about the functions of high quality coolants & antifreeze.

PROPERTIES OF YOUR HIGH QUALITY COOLANT & ANTIFREEZE:

HEAT DISSIPATION:

ANTI-CORROSION:

components.

Inhibitors prevent rust and scale

formation in the vehicle's internal

Removes heat from your engine to ensure that it does not overheat.

ANTIFREEZE:

Glycol offers not only anti-boil but also antifreeze properties so the engine can operate at extremely low temperatures (up to -36 degrees °C).

ENVIRONMENTALLY FRIENDLY:

Lower toxic formulation with higher level of biodegradability in line with the latest EU regulations.

DID YOU KNOW?

A coolant is ready-to-use, an antifreeze needs to be mixed typically at a mixing ratio of 50:50 (vol%) with only distilled or demineralized water.

A survey found that 7 out of 10 vehicles contain rust and scale deposits which highlights the importance of a coolant's & antifreeze's anti-corrosion properties.

5.

Just 0.6mm of deposits can reduce heat dissipation by up to 40% which can contribute to engine failure.

CHAMPION COOLANT & ANTIFREEZE IN THE SPOTLIGHT

Champion has introduced new Coolant & Antifreeze fluids to its range. Designed for modern high-performance engines, these PSi-OAT technology fluids will help reduce engine operating and maintenance costs to give you the peace of mind that only reliable performance can offer.

DID YOU KNOW?

Any coolants in the market today use recycled glycols that have a higher formic acid content thereby reducing anti-corrosion properties. We use mono-ethylene glycols with state-of-the-art PSi-OAT corrosion protection technology. Organic acids work together with mineral inhibitors for the best possible protection.

PRODUCT	ТҮРЕ	TECHNOLOGY	PROPERTIES	SPECIFICATIONS	
-	COOLANT			ASTM D4985, D3306	
		PSI-OAT (Phosphate Silicate Organic Acid Technology)		SAE J1034	
			HEAT DISSIPATION	BMW LC-97 / LC-87 / LC-18	
COS AV STATE S			٢	DAIMLER TRUCK DTFR 29C120 / 29D100	
			ANTI-CORROSION	DEUTZ DQC CC-14	
COOLANT EVO LL -36°C				FORD ESD-M97B49-1 / WSS-M97B44-D / M97B57-A1	
	ANTIFREEZE (Concentrate)		ANTIFREEZE	JLR STJLR.651.5003	
				MAN 324 SI-OAT EVO	
			ENVIRONMENTALLY	VOLVO TR-31854114-002	
ANTIFICIE			FRIENDLY	VW TL 774-L [G12 EV0]*	
			PROTECTION PERIOD	TL 774-J (G13) TL 774-G (G12++)	
			Every 6 years or 250,000km,	TL 774-F (G12+)	
ANTIFREEZE EVO LL			whichever comes first	TL 774-D (G12) TL 774-C (G11)	

CHOOSE **THE RIGHT COOLANT & ANTIFREEZE** FOR YOUR VEHICLE: **FAQ**

Does the colour of a given coolant & antifreeze say something about its quality and performance?

A coolant is nearly always coloured because otherwise it would be water-white! The colour chosen for a coolant/antifreeze differs from one manufacturer to the next and is not an indication of fluid quality and performance. The most common colours are blue, green, orange pink and red.

I need to replace the fluids in my cooling system, does it matter if the colour or technology are different to the fluid that it is replacing?

Colour: no. Technology: check the table!

Whilst it is always recommended to use the same fluid as prescribed by the OEM, in some cases it is possible to mix. Please see chart right for compatibility.

MIXABLE WITH	G11	G12+	G12++	G13	EVO		
G11		•			•		
G12+	•				•		
G12++	•	•			•		
G13	•	•			•

	NOT MISCIBLE						

COOLANT EVO LL -36°C

PRODUCT CODE 50154

PURPOSE •

Designed for modern highperformance engines, this environmentally friendly ready to use long lifetime PSi-OAT coolant helps reduce engine operating and maintenance costs.

COOLANT EVOLL

both newer and older vehicles from EU, US and Asian OEMs in the passenger car, light-duty and heavy-duty vehicles segments. Miscible with all coolant technologies.

KEY APPLICATIONS

Universally applicable fluid covering

[See the miscibility table.]

VW TL 774-L [G12 EVO]* /

TL 774-J (G13) /

TL 774-G (G12++)/

TL 774-F (G12+)/

TL 774-D (G12)/

TL 774-C (G11)

PROPERTIES

- Excellent heat transfer and dispersion
- · Outstanding corrosion protection.
- Superior cold temperature performance.
- · Excellent protection against cavitation.

CORE STANDARDS & SPECIFICATIONS

ASTM D4985, D3306	FORD ESD-M97B49-1/				
SAE J1034	WSS-M97B44-D / M97B57-A1				
BMW LC-97 / LC-87 / LC-18	JLR STJLR.651.5003				
DAIMLER TRUCK DTFR 29C120 /	MAN 324 SI-OAT EVO				
29D100	VOLVO TR-31854114-002				

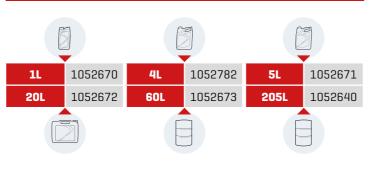

DEUTZ DQC CC-14

KEY SELLING POINTS

- Long-term engine protection (every 6 years or 250,000km).
- VW TL 774-L (G12 EVO) conformity in line with latest generation VW cooling technology.
- Supersedes and backwards compatible with previous G13, G12++, G12, and G11 coolants.
- Multi-OEM, Cross-seqment (Passenger-car, HD on/off etc.) compatibility.
- EVO LL: Environmentally friendly additives with low toxicity and high biodegradability.
- Compliant with the latest EU legislation.

DID YOU KNOW?

- Over 20% of engine failures can be attributed to cooling system failure.
- 7 out of 10 vehicles contain rust and scale and just 0.6mm can reduce heat dissipation by up to 40% which can contribute to engine failure.
- We use mono-ethylene glycols with state-of-the -art PSi-OAT corrosion protection technology where organic acids work together with mineral inhibitors for the best possible protection.
- The glycol in coolants tastes naturally sweet so a bittering agent is usually added.
- Colour is not an indication of performance but is instead used for easier identification.

PACKAGING AND PART NUMBERS

ANTIFREEZE EVO LL

PRODUCT CODE 50054

PURPOSE •

Designed for modern highperformance engines, this environmentally friendly ready to use long lifetime PSi-OAT coolant helps reduce engine operating and maintenance costs.

KEY APPLICATIONS

Universally applicable fluid after dilution, covering both newer and older vehicles from EU, US and Asian OEMs in the passenger car, light-duty and heavy-duty vehicles segments. Miscible with all diluted antifreeze technologies.

(See the coolants miscibility table.)

PROPERTIES

Excellent heat transfer and dispersion.

EVOL

- Outstanding corrosion protection.
- Superior cold temperature performance.
- Excellent protection against cavitation.

DID YOU KNOW?

- Antifreeze is a concentrated form of coolant
- The best ratio to optimise engine protection is 50:50 antifreeze and deionised water.
- Using tap water could lead to blocking of the system or to water pump failure.
- Colour is not an indication of performance but is instead used for easier identification.
- The glycol in antifreeze tastes naturally sweet so a bittering agent is usually added.
